With high ceilings and spacious rooms there are four bedrooms, the main with ensuite, a study, large sunny lounge room, kitchen/meals area and a large two car garage with automatic roller door.

There is also a ducted reverse cycle air conditioning system and ducted vacuuming system.

Externally there is also another garage/workshop amid the superbly designed and flowing gardens. No problems with water either as there is even an equipped bore and your own rainwater tank.

Plenty of room for storage is available under the home as well.

If you are a retiring farmer this is your new home!

Come and impress yourself.
