

Windeyer

In the mid 1800's gold was discovered in the historic village of Windeyer approx 37 Kms from Mudgee. This 38.92 ha approx property must have been a part of it as there are mine shafts in several places on the property.

Its heavily timbered & just the ideal get away with the opportunity of fossicking or just laying back. You're only 6Kms approx from the local hotel so how about it? It has it all! Be quick here. This won't last. Warning mine shafts can be a health hazard!

Land Size : 38.92 ha
